

## Feedback on Eclipsing the Taj Mahal

A controversial statement given by Chief Minister of Uttar Pradesh, Yogi Adityanath the part of Indian ruling party BJP, clearly depicts the religious polarization, Taj Mahal being the legacy of Muslim Emperor. The prevailing extremism of Indian nationalist considering country only a Hindu State, over the last few decades, can be seen under the cover of such decisions revealing a clear motive of creating own cultural and religious identity, ignoring the substantial minorities rights living in the country. However, such moves always create a hatred not only among minorities but also among the educated civic society.

Another aspect can be a diversion of people attention from the socio-economic issues relating to bad health, education, dampening economy, un-employment, thereby building a religious narrative before the upcoming elections.
