

Taj Mahal Eclipsing

Taj Mahal is a historical reflection of Muslim's architecture. Indian government has made Taj Mahal obsolete from its tourism guide which reflects their enmity with muslims.

In the past, such practices have been made by the Indian government like demolishing of Babri Mosque on 6 Dec 1992.

Hindus are worse in enmity with Islam and Muslims and they have been trying time and again to harm muslims by their coward tricks and traits in India as well in Pakistan.

In spite of cultural differences, both the countries have old relics, historical buildings, monasteries, temples, mosques and other monuments which have great importance for tourism globally. If India takes such steps, in reaction Pakistani public will start thinking, in revenge, to demolish their interests in Pakistan which will lead to increase the hostility between both the countries.
