

# **Taj Mahal**

In my view, excluding the Taj Mahal from official Government tourism brochure is not fair. Taj Mahal is not only the heritage of Muslims but it belongs to the whole humanity. If we keep the religion aside then we can realize that Taj Mahal is the most recognizable architecture icon and romantic structure along with china's great wall and Egyptian pyramid's as a true wonder of the world. India should preserve this heritage just like the other countries are doing. This monument is the master piece of Mughal architect, a great work done by the humans in the history.
