

Taj Mahal

Intolerance, extremism and exploitation of minorities has become a permanent trait of political party BJP in India. The recent act of denouncing Taj Mahal by Uttar Pradesh government symbolizes the racial and prejudice mind-set of extremist Hindus and displays the extent of their hatred for Muslims. Taj Mahal, a declared international heritage of peace, love and purity, one of the wonders of human architecture, is attacked with the efforts to blur its cultural, social and anthropological significance. Ironically this effort may not affect the status of it rather will only signify the maximalist perspectives of mental corruption of extremist Hindus and will expose their political manifesto of terrorizing Muslims in India.
